

The repeal of net neutrality is crippling to not only Americans, but everyone in the world. It will destroy the internet community as we know it; it will kill businesses, artistic creators, communication and the spread of information, and the futures of many people such as myself who haven't gotten a chance to get started yet. It will destroy what little following I have as an artist, and will severely reduce my chances at turning my hobby into a career. It is a violation of our rights as U.S. citizens, as members of the international community, and as humans, and it is a violation of our First Amendment rights as citizens of the U.S.. The restrictions that ISP internet providers will put on universal access is devastating for anyone who can't pay for it. I am actively pledging my resistance to corporations whose only aim is to make more money and control/restrict my freedom to access websites and information that I want to see. I invoke the First Amendment of the Bill of Rights when I say that Title II net neutrality SHOULD NOT be repealed, and I will do everything in my power to prevent that from happening.
